

Best close-flyby comet satisfying the literal Matt 2:9 criteria
 $q = 0.998$ AU, $e = 0.709$, $i = 2.2^\circ$ — guidance: 0.58 h (58% of 1 h minimum)

(a) Sky track: Bethlehem, 5 BCE
Best close-flyby orbit — N up, E left

(b) Azimuth and altitude vs time

(c) Apparent angular velocities vs time
